Quiz 1 will consist of 12 – 15 questions from the material that we cover up to (and including) one week before the quiz (which will be either February 9 or 11, depending whether we do the quiz on February 16 or 18). You will have 45 minutes, starting at the beginning of the class, to complete your answers. All questions will be fairly basic and simple, and will need short answers (few lines to a short paragraph, some only a few words). Knowledge of fundamental notions, concepts and relationships, important principles will be required. You will not be asked to elaborate derivations or calculations, but knowledge of basic formulae will be assumed. Quiz 1 will be closed books, closed notes, closed computers and all other electronic devices, cheat sheets, etc. Questions, concerns? Please ask me.
