The midterm exam, Exam 1, will be take-home, open book, open notes and open computer, but using restricted other resources (s.a. internet). Exam 1 will be handed out in sealed envelopes at the start of the class period on Thursday, October 15, and will have to be turned in by October 16 at 5pm the latest. You will be allowed to use your existing R scripts (scripts that you developed for home works, received in lab exercises, or otherwise created). All necessary data will be provided ahead of time. More specific instructions will be given with the exam.

You will be required to work alone, and give and sign the honor pledge. You will have to do the exam within one day (24 hours) from the time of opening your envelope, but submitting no later than 5pm on Friday, October 16 (whichever comes first). You will be allowed to do the exam in more than one session as long as the total time from opening the envelope and submitting your exam does not exceed 24 hours. You will have to record the times of your sessions. The material for Exam 1 will include what we cover by October 8. The review session on October 14 may be very helpful, take advantage of it. Expect R simulations!

Exam 1 will have to be turned in electronically through Owl Space just like the home works. Please leave ample time for preparation of your write-up, upload, and verification of what you uploaded, before the deadline. (Keep a hard copy. In case of electronic problems, you can drop the hard copy at my office or with Josh Taylor before the deadline.)

I may update this information between now and the date of the Exam.
