Available online 29 July 2004

Figs. 3, 4, and 5 contain errors and are to be replaced by the corrected figures below.

Fig. 3. The original version had vertical axis numbers that were 10 times too small.

Fig. 4. (a) The original version had a finite offset due to the magneto-optical activity of the magnet window, which was subtracted in the revised version. (b)–(e) The vertical axis numbers were mixed up in the publication process.

Fig. 5. The original version had vertical axis numbers that were 100 times too small.
