

QUIZ1 will consist of about 10-15 questions (depending on the mix of multiple-choice vs short-answer questions) from the material up to (including) Feb 14. You will have 45-50 minutes, starting at the beginning of class, to complete your answers. All questions will be fairly basic and simple, and will need short answers (few lines to a short paragraph, some only need a few words). Knowledge of fundamental notions, concepts and relationships, important principles will be required. You will not be asked to do elaborate derivations or calculations, but knowledge of basic, important simple formulae will be assumed.

QUIZ1 will be closed books, closed notes, and closed electronic devices.

I will try to make Quiz 1 electronic. If I succeed, you will need your laptop or tablet, which will be the only device allowed. I will announce this at least 1 day before class on Feb 21.

If we do an electronic Quiz1 I will have hard copy versions with me in case some students have difficulty using the e-version.

Questions, concerns? Please ask me.
