RICE UNIVERSITY COURSE/INSTRUCTOR EVALUATION

17. Please give a written statement (in the space provided below) of your opinion of the teacher and course. Be sure to provide a complete explanation for your answers to questions 8 and 13 on part 1.

Dr. Mohanram is an extremely effective lecturer. He is engaging, and brings much practical experience to the class. Additionally, he is one of the most approachable professors I have encountered. He goes above and beyond what is required of him in dealing with each student.

The class is still new, so there are some bugs that still need to be worked out - namely, how much material should be covered and the structure of homework/programming assignments/projects. The exams, however, are well thought out and contribute much to the class. Overall, it is a good "whirlwind tour" of CAD for VLSI.

The instructor is sensitive to the need of the class. He made the effort to get the materials across clearly to the class. He is also helpful, considerate and a very accessible outside class.

I can say he really has a passion in teaching and learning. The course is nicely organized covering all the essential parts of the VLSI CAD flow. Instead of assigning papers to students, the instructor more carefully selected some readable papers and notes to abstract the overwhelming details, usually, for a beginner in this subject of VLSI, those details are unnecessary. I think the instructor too has put an excellent balance between the big picture and the detail. Thanks.

Prof. Kartik is very enthusiastic about teaching and has great presentation of the material. The class was very good.

Suggestions:

- Cover more topics and going into some in less detail
- More through detailed intro to C++
- Initial test scored some people away maybe give buy not for credit
