I thought the class was well formatted & professor was very knowledgeable. Presentations were interesting & I learned a lot from my project. Overall enthusiasm from professor was refreshing, especially early in the morning.

I enjoyed the class, the material was very interesting and extremely applicable to industry. I would have liked more mini-assignments/HWs to reinforce what we had learned in class. I thought Dr. Mohanram was an effective instructor.
All in all, the course was very useful in terms of introducing new concepts of the field. However, in order to improve its quality more assignments are required which cover at least some of the discussed subjects. Besides, the first portions of the course (which included C-programming & BDDs) were not taught could have been taught better.
